

Flambeau®

Buyer's Guide

2

Flambeau® Zerust® Series

No gimmicks or gadgets...Zerust® corrosion inhibitor is built in.

Flambeau's polymer based Zerust® material emits a harmless, odorless vapor that fills the inside of our Zerust tool storage line and forms a protective layer around metal objects during storage. Look for the Zerust symbol next to those products that feature this revolutionary technology

- Patented and licensed exclusively to Flambeau®
- Molded directly into the plastic
- Completely hassle-free; does not require maintenance
- Inhibits rust & corrosion for up to 5 years

The 24 Hour Test

Without Flambeau® Zerust® Protection

Few problems are as pervasive as corrosion. Corrosion attacks metal products during manufacturing, shipment, storage and even while in use.

With Flambeau® Zerust® Protection

Flambeau® Zerust® provides a solution to the corrosion problem. It helps to increase efficiency, saves money and most importantly protects tools and hardware keeping them operational.

Test performed with distilled water and Flambeau® Zerust® Capsule submerged 48 hours prior to adding metal.

Utility Storage Boxes: Ultimate Utility Boxes with Zerust®:

- Ultimate storage with Zerust anti-corrosion protection
- Waterproof O-ring silicone gasket
- (3) Cam over Drawtite™ latches for a tight seal
