

VISITOR PREPARATION GUIDE

REVIEW YOUR PRODUCTION REQUIREMENTS

Capacity, quality, assembly and delivery

Where would better production support help?

Choose a part or assembly you order regularly. Bring a sample or recent order and tell us what works well and what you'd like to improve.

Capacity & demand

- ☐ Typical order quantity and how often you place an order.
- ☐ Annual demand, seasonal peaks and expected changes in volume.
- ☐ Parts or variants that are hardest to keep in stock.

Assembly & packing

- ☐ A sample or photo showing how the moulded parts fit together.
- ☐ Fittings, labels or other operations needed after moulding.
- ☐ How each unit should be packed, protected and identified.

Quality & consistency

- ☐ A drawing or approved sample showing the finish and fit you expect.
- ☐ Critical dimensions, inspection checks and traceability requirements.
- ☐ An example of a recurring defect and how it affects the finished product.

Stock & delivery

- ☐ Required lead times and delivery frequency for each site.
- ☐ Stock levels, reorder points and who holds the stock today.
- ☐ A recent shortage or late delivery and its impact on your operation.

What one change to your current supply would make the biggest difference?

Meet Flambeau at stand C320

Southern Manufacturing & Electronics 2027

2–4 February 2027 | Farnborough International Exhibition Centre

Arrange a meeting via the SME27 hub >
