

VISITOR PREPARATION GUIDE

PREPARE FOR A TOOL TRANSFER

Tooling information, validation & transition planning

What's prompting the move?

Tell us why you're considering a transfer and when you need the first delivery. Bring whatever records you have.

Tooling information

- ☐ Tool references, current location and number of moulds and cavities.
- ☐ Tool dimensions, weight and current press size, if known.
- ☐ Maintenance records, known wear and any repairs due.

Trials & validation

- ☐ An approved sample for comparison after the move.
- ☐ Critical dimensions, fit checks and any test requirements.
- ☐ Who will approve the trial parts and what evidence they need.

Parts & process

- ☐ A current production sample and the latest part drawing.
- ☐ Material grade, colour and finish for each part or variant.
- ☐ Current cycle time and any recurring moulding issues.

Transition planning

- ☐ Current demand and how many weeks of stock you hold.
- ☐ Last planned run at the current site and earliest tool release date.
- ☐ Target date and quantity for the first approved delivery.

What matters most during the move, and which dates are fixed?

Meet Flambeau at stand C320

Southern Manufacturing & Electronics 2027

2–4 February 2027 | Farnborough International Exhibition Centre

Arrange a meeting via the SME27 hub >
